

KEEP EACH OTHER SAFE

Stop the spread of COVID-19

How COVID-19 spreads

- The virus can spread from someone's mouth or nose in tiny invisible droplets
- You can spread the virus by touching surfaces
- COVID-19 can spread in places without enough fresh air
- The virus can spread through blood, urine, faeces and tears

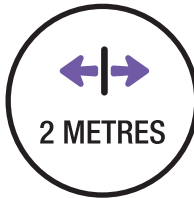

We do the basics to keep each other safe

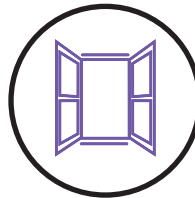

Wash your hands regularly

Wear your face covering

Follow all social distancing rules

Make sure there is good air flow at home and at work

Be kind to each other
